

Application Report Customer Profile

David Brown Huddersfield

Customer: David Brown (Textron)
Product: Sobo LF
Sector: Industrial
Contact: Philip Roberts
Replaced: Castrol Tunnel Wash

The escalating costs of David Brown's existing degreasing cleaning fluid in their hot wash spray machines, led the Company Chemist Philip Roberts to look at the market place for a viable solution that would solve the problem of degreasing as effectively as the existing solvent based fluid but also provide the organisation with some cost saving benefits.

Rozone supplied a product called Sobo LF for trial. It is biodegradable and Ph neutral – benefits which were of keen interest to David Brown – but would it give the same results?

The trial was undertaken on-site at the Huddersfield operation so that the David Brown team was able to make a direct comparison between their current cleaning solution and Sobo LF.

The outcome was impressive – not only was the cleanliness specification way above that of the required level but the cost savings were also more than significant – a saving of over 50% on running costs compared with their previous solvent based product.

The outcome? David Brown is now using Sobo LF in all of their hot wash spray machines.

David Brown has built a wealth of knowledge, experience and capabilities over 145 years by focusing on the needs of end user customers with fast, direct support as the premier global provider in the Heavy Process Industry, Marine and Land Defence markets.

Its parent company, Textron Inc. is a \$10 billion multi-industry company with more than 44,000 employees in 40 countries. Textron leverages its global network of aircraft, industrial and finance businesses to provide customers with innovative solutions and services.

Low Environmental Cleaning Chemicals

Reducing Volatile Organic Compound (VOC) Emissions, conducting Risk Assessments with regard to operator exposure, ensuring correct disposal of spent cleaning products as hazardous waste, the avoidance of water pollution, endocrine disruptors, carcinogens and other potential hazards - these are just some of the issues facing chemical users with regard to their specification and choice of cleaning products. Rozone's range of low environmental impact cleaning products have been specifically formulated as a complete package of "Sustainable Solutions" - solutions on two fronts, firstly that many of them are aqueous based, and secondly that they solve problems; Sustainable in 3 key ways - environmental, social, and of course, economic. By specifying a cleaning product from Rozone, you can rest assured that you are making your compliance requirements that little bit easier, but without compromise in other areas.
