

Ozzy Juice

Degreasing Fluid for the Smartwasher™

Ozzy Juice is a pH-neutral mixture of emulsifiers and surfactants that contain very low volatile organic compounds (VOCs), phosphates, formaldehyde, biocides or solvents. This mixture is blended in a liquid form to produce a biodegradable, non-toxic, non-caustic and non-hazardous oil dispersant and degreaser. Ozzy Juice contains no known carcinogens, no OSHA or DOT regulated chemicals, no ingredients requiring SARA Title reporting, no RCRA hazardous waste chemicals, and no items on the CERCLA hazardous substances list.

There are two variations of degreasing fluid which are used with the Smartwasher™ depending on the cleaning application:-

SW-3i – General Degreasing Solution – a highly efficient cleaner on contaminants such as :-

- Motor Oil, Bearing Grease, Automotive Grease, Impacted Grease, Creosote, Resin
- Hydraulic Fluid, Transmission Fluid, Crude Oil
- Wheel Grease, Solder and Flux, Animal Fat

SW-6 – Select Metals Degreasing Solution

An environmentally safe, biodegradable, liquid cleaner which is not corrosive to a wide range of yellow and ferrous metals such as copper, cobalt, silver, magnesium, nickel, aluminium, titanium, cadmium, iron and steel. The unique blend of surfactants in SW-6 effectively reduces the surface tension of water and soil, allowing deposits to be easily rinsed from metal surfaces without streaking

TECHNICAL DATA

See Material Safety Data Sheet

PACKAGING

20 Litres

SAFE HANDLING

Store in original containers and avoid extremes of temperature.
