

REACH COMPLIANCE STATEMENT

As a downstream user Rozone Limited is committed to fulfilling its responsibilities under the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) regulations through the following:

Reviewing on receipt of safety data sheets (SDS) to identify and apply appropriate measures to adequately control the risks associated with the material.

For extended SDS additional checks for the exposure scenario covering our use of the substance and the conditions of use or consider alternative handling measures or materials.

To inform our suppliers if the recommended risk management measures are inappropriate and if new information on hazards becomes available to feed this back to suppliers without delay.

Where chemicals of concern may be subject to regulatory risk management such as authorisation, restriction or harmonised classification, Rozone Limited will monitor the regulatory activity and position to make sure we are aware of our responsibilities that apply now or will in the future. Where required, Rozone Limited will provide information necessary for decision making by regulators.

Rozone Limited reviews ingredients and formulations for the products it produces and classifies them according to requirements of CLP for labelling, classification and packaging.

Safety Data Sheets are created and issued to its customers for all products manufactured by Rozone Ltd to communicate hazards and information for the safe use of the product.

Rozone Limited will on receipt of new information relating to risks measures, hazards, authorisation states or restriction update and re issue the SDS without delay and advise its customers of these changes.
