HIGH PERFORMANCE CLEANING. LOWER HEALTH & SAFETY RISKS.

Our Commercial Kitchen cleaning range has been specially developed to effortlessly remove tough grease and grime from kitchen surfaces, appliances, ducts, vents, floors and even ceilings.

We specialise in solving cleaning problems that have traditionally been the preserve of effective but potentially hazardous chemical products, replacing these wherever possible with water-based or safer solvent-based solutions, assisting with the protection and wellbeing of users whilst offering environmental benefits to the organisations using them.

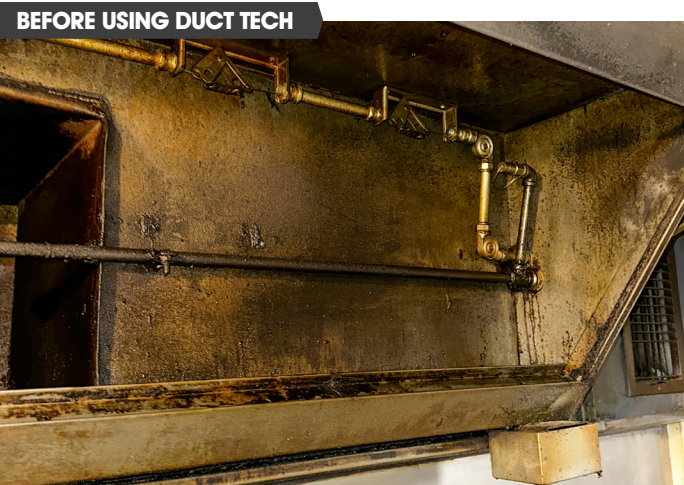

SAFER, EASIER... IT'S A DIRTY JOB. WHY DO IT THE HARD WAY?

Our Kitchen Duct-Tech® range includes vent and duct cleaning products, heavy duty burnt on grease and carbon removers, disinfectant and surface restorers – all designed to leave a spotless finish.

Following many years' experience working with leading Commercial Kitchen Cleaning Service Providers, our on-the-job evaluation and attention to customer feedback has ensured a user-friendly product range that meets industry demands to the highest standard.

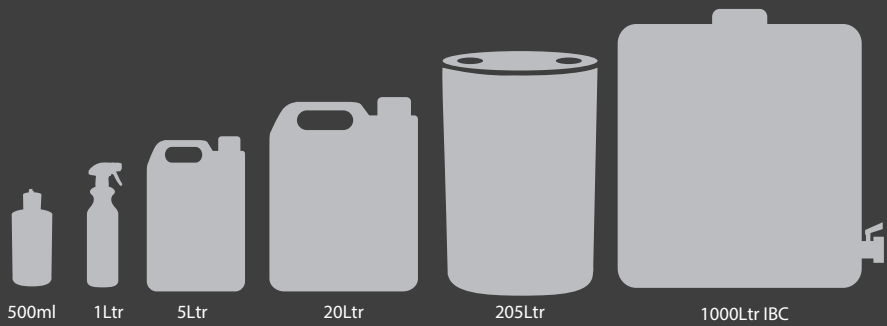

Traditionally, cleaning professional kitchen extract ducting systems has required an operator to take high pH, caustic and often offensive chemicals into enclosed spaces. These chemicals, by their very nature, carry significant health and safety risks which are amplified by the environment of a ducting system.

Our revolutionary Duct-Tech® Gel removes both the danger and the effort from the process without compromising performance. Tough on contaminant build-up, it's safe and pleasant to use, whilst being easy on the environment.

BEFORE USING DUCT TECH

AFTER USING DUCT TECH

DUCT-TECH® ... YOU'RE IN SAFE HANDS

Rozone has specially formulated Duct-Tech® Gel with complete understanding of the unique requirements of cleaning kitchen extract ducting systems, whether they involve short transition ducts or many linear metres of horizontal or vertical ductwork. In tests, when compared to traditional kitchen extract ducting chemicals, Duct-Tech® Gel reduces the time required for effective duct cleaning by almost 50%. Duct-Tech® Gel is non-toxic, non-corrosive and pH neutral. This spray-on gel formulation cuts effortlessly through accumulated grease and oily deposits even when they have hardened, without risk to the user, surfaces or equipment.

HARDWORKING WITHOUT THE ELBOW GREASE

User benefits

- pH Neutral – no risk of burns to skin
- Non-corrosive – no damage to surfaces or equipment
- Sprayable gel formulation – sticks to surfaces with no splashes or drips
- Non-toxic
- Non-caustic

Customer benefits

- Effective cleaning reduces combustion load
- Maximises ventilation efficiency
- Ducts must be regularly maintained or catering outlets risk invalidating their insurance as they will not be compliant with TR19 guidelines.

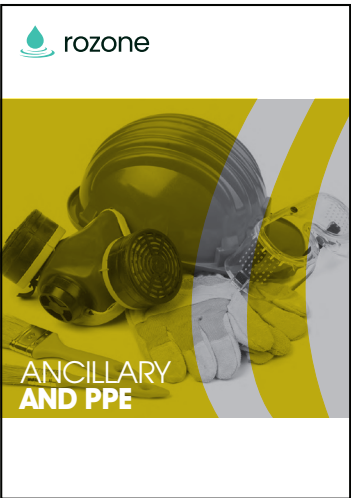

Along with our commercial cleaning solutions, we have easy-to-use sprayers and applicators to make those hard-to-reach areas accessible. Ranging from handheld compression sprayers to hand pump models with a stainless steel lance, our applicators and sprayers help to directly spray the product where you need it.

DESIGNED, FORMULATED AND MANUFACTURED BY US

Our range of own formulation chemical products, have all been designed, formulated and manufactured in our UK plant to a constantly high standard with quality control and full traceability across all lines.

All the raw materials used in our products are REACH compliant and we are fully aware of our legislative obligations and requirements - using Rozone's cleaning products on a regular basis means you have an element of compliance built in.

We've learnt over the years that use of correct application equipment can have a huge effect on the efficiency and efficacy of cleaning operations and that's why we don't just supply the cleaning product itself. We have a range of cleaning machines, application equipment and ancillary goods to compliment our chemicals so your cleaning operations can be performed to the highest standards.
